

Acme™ Smoked Fish

The highest quality ingredients. Time-honed techniques. Unyielding attention to detail. Seriously great smoked fish comes from a continuous commitment to craft.

Premium smoked fish starts with premium raw materials. To ensure consistency of great taste, we rigorously audit and test all our suppliers and fish.

Salt preserves the fish—but it also enhances the taste and texture. We use wet brines and dry cures to ensure a tender, flavorful experience.

Over a proprietary blend of natural hardwoods, we cold and hot smoke our fish according to tradition and the best practice for each species.

From innovative packaging to state-of-the-art facilities, we focus on the details to deliver products of the highest quality and food safety.

Aroma, appearance, flavor—each smoked fish offers a singularly satisfying experience. Before each bite, we prepare to savor the smoked fish deliciousness.

Featured Items:

SUPC: 4409274 | Packed RW/7pc.

This ready-to-eat treat is buttery, smoky, and oh-so-subtly sweet. To make this smoked fish sing, we start with a premium cut of Atlantic salmon which we trim by hand, season with just enough salt, and brushed with honey. Then, it's off to the smokehouse. After a few hours at 165°F, the fully cooked fillets take on serious flavor and succulent texture.

SUPC: 0943399 | Packed 2/5lb.

Smoked Nova Trim Salmon is ready to be added to your favorite recipes, no prep necessary! These tempting Smoked Salmon tidbits offer bite after bite of indulgence. If you can resist eating them all in one go, try them scattered on top of pizza, mixed into your salads, or folded into scrambled eggs.

SUPC: 7240066 | Packed 2/4lb. Avg.

To craft a smoked salmon as commanding and intense as the Scottish landscape itself, we trim, cure, and smoke the finest North Atlantic salmon over a blend of North American hardwoods. And we keep smoking it - twice as long as tradition says - to develop supremely sultry layers of brine and smoke, while preserving the salmon's buttery feel and succulent texture.
